IMPORTANT MESSAGES

The new electric meter at your premises has a multiplier of 180. Your use of electricity on this new meter is determined by subtracting the previous reading from the present reading and multiplying the difference by this multiplier.

We recently changed your meter. Energy usage shown combines usage from both the removed and new meters.

We're working harder than ever to provide energy for a growing Long Island and customers like you are helping us improve our performance. Thank you. Your credit rating is tops with us!

This summer Long Island experienced several days of high heat and humidity with temperatures reaching the high 90's. While LIPA has not increased rates and charges in 2006, the increased use of air conditioners, fans, dehumidifiers and other summer-related equipment to provide relief from the heat can result in higher summer electric bills. Learn to use electricity more efficiently - call us at 1-800-490-0025 or visit us online at www.lipower.org for our booklet, "53 Ways to Save Energy and Lower Your Electric Bill."
